Digital Signage...Simplified

Digital Signage for Healthcare

Healthcare is an ever-changing field and digital signage is the ideal way to keep your patients and staff up to date. Display everything ranging from health news, alerts, facility information, employee announcements as well as daily café menus to local news and weather. Updates can be made quick and easy from any computer on the internet.

Digital Signage enables you to:

- Educate patients and staff about health related topics
- Display physicians and staff Bios
- Create virtual tours of your facility / practice
- Add way finding and touch screen interactivity
- Update the display from any computer on the internet
- Post announcements, upcoming events or welcome messages
- Display emergency alert messages
- Promote your brand colors and logo
- Broadcast the same or unique information to all your locations
- Display real-time weather, news and financial data

Package includes:

- Commercial grade LCD displays
- Web-based content management software
- PC based media player
- Mounting brackets and hardware
- Screen layout setup
- Online training

Optional:

- Security and custom enclosures
- Touch screen option
- Professional installation service
- Content creation and video production
- Consulting, project management
- A/V sales
