Every business needs ways to communicate its key metrics, upcoming events, and mission critical alerts to its employees. Whether you're a large Fortune 500 corporation or a small business, you need to empower your employees with the latest information they need to make educated decisions and improve performance.

While newsletters, bulletin boards, emails and Web sites have traditionally facilitated corporate communications the recent arrival of digital signage has offered a new alternative for delivering both real-time and dynamic messaging.

Digital Signage Enables You to:

- Welcome customers and visitors
- Instantly post and update sales figures
- Display key stats and real-time metrics
- Recognize employees and business partners
- Post company announcements or upcoming events
- Display emergency alert messages
- Promote the company brand, colors and logo
- Display real-time weather and news
- Schedule and update media content instantaneously

Complete End to End Solutions

Located in the heart of New York, Packet TV, Inc. is a digital media and systems integrator who specializes in the customized design, installation and management of digital signage and digital out of home networks.

Our focus is to simplify the process of deploying this communication technology for companies that are looking to engage, target and influence their audience.
